

April 2008

News you can use...for our Batteries Plus Franchisees

In the next issue:

One common claim is
**Damage to Your
Customer's Cars.**

Upcoming issues will
address Break-Ins and
Employee Theft.

Dear Franchisees – Think safe, Be safe!

Our safety and loss control specialist Mark Shaffer joins us to discuss some safety issues and programs that can save you money. Those franchisees who are currently insured with us will be sent more in-depth information. Those who are not, see if any of the issues below interest you. If so, we'd love a chance to work with you! **If you have any questions or ideas for future newsletter issues don't hesitate to e-mail them to gina@molyneaux.com.**

A 15 year history of
knowing your business
and the ability to
understand your
problems...

*Isn't that what you
want in an agent?*

Let's talk safety...

We are developing a sample Safety Program that will be sent to our current customers soon. We know you will find it useful as we realize most of you do not have the time to do this on your own. If you are not one of our customers but think this kind of information is worthwhile, please contact us! We would love to work with you and give you access to these kinds of services.

An effective safety program includes these elements:

- 1) Applicable to your business
- 2) Cost-effective
- 3) Easy to implement and communicate
- 4) Effective in reducing your risk

The safety program we will be sending you:

- 1) Is specifically customized for Batteries Plus franchisees
- 2) Costs you nothing if you are already a customer
- 3) Is laid out as an easy to implement plan
- 4) Includes proven programs and techniques.

Here is a condensed listing of what is included:

- New hire orientation
- Return to work program – lower your workers compensation costs by getting workers back to work as soon as possible
- Accident investigation – lower your costs of risk by learning from bad outcomes and near misses
- Fleet safety/Driver selection – control auto claims with proactive policies and procedures
- Safety audit checklist – make sure your store environment is a safe one
- Training calendar – formalize safety by scheduling training or compliance
